Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Arguments

Applicant's arguments with respect to claims 25-41 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25, are rejected under 35 U.S.C. 102(a) as being anticipated by applicant's admitted prior art.

Regarding claim 25, in applicant's description of the background art, a method of adjusting the third order intercept of an LNA in a transceiver comprising detecting at least high and low transmit powers of the transmitter; and if the transmit power is high, setting the IIP3 to a maximum level. See specifically Page 3 lines 21-29 of the specification, wherein applicant describes this method as part of the prior art which the applicant is seeking to improve.

Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Sroka et al (US 5,590,411).

Art Unit: 2618

Regarding claim 25, Sroka discloses a method of adjusting the third order intercept of an low noise amplifier (LNA, 300) in a transceiver having a transmitter (106), a receiver (102), and a processor, comprising: detecting at least high and low transmit powers of the transmitter; and if the transmit power is high, setting the IIP3 to a maximum level. (Col. 5 lines 18-36)

Allowable Subject Matter

Claims 29-41 are allowable.

Claims 26-28, 30-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cho et al. (US 6,208,849) and Loke (US 6,311,048) are cited as relevant to the state of the art near the time of the invention, but having later filing dates.
